LinkedIn

Instagram

Github

Experience

Multimedia Designer @ Off the Beaten Track

Aug 2024 – Oct 2024

- 3D spatial design and rendering for exhibitions and roadshows
- Design and develop interactive websites and touchpoints
- 3D character design, rigging, and animation

Product Designer @ Picup Media

Aug 2024 – Oct 2024

- R&D, UX, and Design for new physical and digital products
- Develop marketing microsites and widgets

Front-End Dev @ Hans Tan Studio

Jun 2022 – Jun 2023

- Developed the Hawker Colours mobile-only site using ReactJS.
  - Created unique interactive forms, data visualisation, and interactive stories
  - Survey responses from >1400 people
  - Awarded the Good Design Research Grant from DesignSingapore Council

Front-End Dev @ Design Incubation Centre

Jan 2023 – Jun 2023

- Prototyped and developed an NFC-enabled app for NUS Natural History Museum's interactive exhibition using Flutter
- Developed all the minigames for each touchpoints on p5.js

Notable Clients

Interaction Design @ Disney+

Apr 2022 – Jun 2022

- As a youth collective, I helped develop software solutions for an immersive digital graffiti wall for a 3-day Ms. Marvel launch event
- Built the base engine and logic using p5.js to communicate with a Lidar sensor

Interaction Design @ National Youth Council

Jul 2022 – Dec 2022

- As a youth collective, I helped to plan, workshop, prepare, and attend to *LightPark* and *Reactive Botany* interactive projects
- Received grants under National Youth Council's Realise Your Somerset Project

Website Development

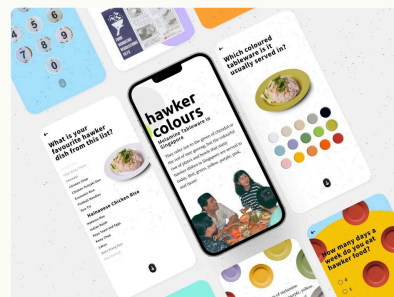

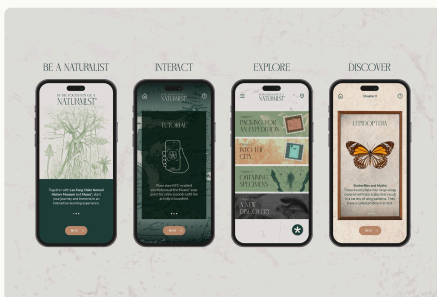

Web Design and Development @ Sproud

Jul 2024

- Designed the Sproud website on Figma
- Developed the design into a responsive website using HTML, CSS (Tailwind), and Javascript. Made custom marquee, modal box, carousel components.
- Hosted site (for archival only): https://sproud-web.vercel.app/

ReactJS Personality Quiz @ Singapore Art Museum

Jan 2025

- Personality quiz on a touchscreen TV to supplement the Makers' Market for Singapore Art Week @ SAM 2025
- Designed on Figma. Built with React, Vite, Tailwind, NextUI, and Framer Motion, locally hosted for the event
- Hosted site (unoptimised media): https://tree-of-life-eight.vercel.app/

Front-End Dev @ Design Incubation Centre

Jan 2023 – Jun 2023

- Prototyped and developed an NFC-enabled app for NUS Natural History Museum's interactive exhibition using Flutter
- Developed all the minigames for each touchpoints on p5.js

Web Dev @ Hans Tan Studio

Jun 2022 – Jun 2023

- Developed the Hawker Colours mobile-only site using ReactJS.
  - Created unique interactive forms, data visualisation, and interactive stories
  - Survey responses from >1400 people
  - Awarded the Good Design Research Grant from DesignSingapore Council
